CRYO PRO™

COLD COMPRESSION
THERAPY

COLD COMPRESSION THERAPY

Cold compression therapy works by constricting the blood vessels, which in turn reduces swelling and inflammation. The Cryo Pro™ control unit features automated compression and easy set-up for patient comfort.

The Cryo Pro™ Unit features nine different modes for varying pressure and time sessions. You can choose from 3 different modes of compression – low, medium and high – to accommodate your cold compression needs.

Cold compression therapy can also calm muscle spasms, minimise bruising, and soothe nerve endings, helping encourage quick and effective healing for a variety of muscle, tendon, and ligament injuries.

In addition, cold compression can help reduce a patient's dependence on painkillers following injury.

- Provides pain relief
- Reduces swelling and inflammation
- Prevents or limits bruising
- Slows or stops bleeding

CRYO PRO™ PORTABLE PACKAGES & ITEMS

The Cryo Pro™ has been designed to be convenient wherever you want to use the unit. Portability is not an issue for the Cryo Pro™.

The unit comes with a handle which is designed to balance when water and ice are in the reservoir. Featuring 3 different modes of compression to suit your recovery. It provides effective and comfortable cold compression therapy.

The Cryo Pro™ Portable Bag is designed to hold the unit and wraps with a comfortable and adjustable strap. The bag features additional storage space to fit the drain gadget and any additional wraps.

- 2 wraps of your choice
- Portable bag
- Portable power bank
- Drain tool

'encourage quick and effective healing for a variety of injuries'

SIMPLE TO USE

The Cryo Pro™ is a simple-to-use product, requiring only ice, water, and power (mains or battery). The wraps are simple and easy to apply – one size fits all with the hook and loop fixing allowing the wraps to be adjusted to fit each patient correctly.

The Cryo Pro™ unit has a straightforward digital display with 9 settings to control session time and compression level. It is simple to empty and clean, removing the water from the main unit is easy due to the removable lid. The wraps are easy to drain, using the draining gadget.

WRAPS

The Cryo Pro™ enables you to target specific areas of pain or swelling with our full range of wraps. These include 360 Knee, Shoulder, Ankle, Universal, Full Leg and Full Long Leg.

Shoulder Wrap

Can be adapted to hold the arm in a steady position.

360 Knee Wrap

Ideal for rehabilitation and recovery from knee injuries.

Ankle Wrap

Target ankle pain or swelling with adjustable hook and loop fixtures.

Universal Wrap

You can apply the wrap, most effectively applied to the back, thigh, calf, or upper arm.

FULL LEG & FULL LONG LEG WRAPS

The Cryo Pro™ Full Leg & Full Long Leg wraps are supplied with a pump to provide extra compression for the large wrap.

These wraps are specifically designed to provide superior compression and comfort. Equipped with an adjustable pressure pump, it can be tailored to your needs so you may enjoy a more comfortable post-treatment recovery period.

Full Leg Wrap

The Full Leg Wrap provides cold compression to the whole leg. Full Leg Wrap Length: 63.5cm (25 Inches)

Full Long Leg Wrap

The Cryo™ Pro Full Long Leg Wrap provides cold compression therapy to the whole leg. It is slightly longer than the Full Leg. Full Long Leg Length: 82cm (32.3 inches)

RENTALS

The Cryo Pro™ is available for rental if, instead of purchasing it, you would like to use it for a short period (2 weeks minimum). You will also have the option to purchase the unit at the end of your rental period.

The Cryo Pro™ rental includes the Control Unit and a wrap of your choice. To find more information about rentals visit our website: www.kinetecuk.com

This service is available only in the United Kingdom (exc. NI).

“ The dr. aktive Cryo Pro™ has been an absolute game changer for me. I use it before and after training/competition to help aid my recovery. Having previously had various shoulder surgeries, and niggles I have to make sure I stay on top of my shoulder health to allow me to perform at my best in the pool. The Cryo Pro is so easy to use, and I love the fact you can use it on either mains or battery, making it super convenient to use. ”

Suzanna Hext, Paralympian

“ Lasswade RFC started using Cryo Pro™ at the beginning of the season.

Our coaching and physio teams have been delighted with them and have found that when using Cryo Pro™ as part of the recovery program payers are getting back to full fitness in a much quicker time frame.

They're easy to use and can be utilised either as part of a scheduled session or at the pitch side in immediate response to any injury. ”

Billy Knowles, Club President, Lasswade RFC
