

GRIPABLE PRO

FUN, ACCURATE, MOTIVATING REHAB

The GripAble Pro provides fun and engaging training activities that focus on different aspects of grip, hand and wrist movement, giving you real-time feedback on your activity and reps.

Through the GripAble app your therapist can create personalised training programme and see your progress.

-  Ideal for professional use
-  Create a dedicated profile for each of your patients
-  Dynamometer function; different grip measurements possible (isometry, endurance, right/left comparison, GRIT, etc.)
-  Targeted work on each movement (grip/release, extension/flexion, ulnar/radial deviation, pronation/supination of the wrist)
-  Motivating, interactive activities adapting to the progress of the patient, including varying levels of difficulty

The future of mobile rehab

Patients can play engaging and motivating games for hand movements and grip:

-  Grip and Release
-  Wrist extension and flexion
-  Pronation and supination
-  Wrist radial and ulnar deviation
