 **X-LITE**[®]

WELCOME

to our hand therapy solutions

First Class Products

From the Spanish word 'Mano' for hand, the Manosplint® brand represents a range of hand therapy products including low-temperature thermoplastics, new in technology, heat pans and accessories.

The Manosplint® thermoplastics comprises a full range of materials for all of your splinting needs. From 3.2mm to 1.6mm, solid to various perforation options and high-to-low resistance to stretch, our range provides superb quality and great value. Our materials have exceptional edge finishing, saving you valuable time whilst leaving your finished orthosis with soft sealed edges.

X-Lite® Range

Now introducing the X-Lite® product range, a revolutionary range of high quality, biodegradable splinting and casting materials. Kinetec are delighted to include this range in our product offerings and we are excited to feature eco-friendly, non-toxic and zero waste products for our customers. X-Lite® provides a solution to plastic waste in multiple ways, including its durability allowing you to reheat the material any number of times, meaning that every bit of material is used.

Once the patient is finished with the splint, it will biodegrade over time, avoiding any contribution to waste.

Innovative Printing

We offer a unique printing service for our Demi sheets of Manosplint® material with over 100 colourful and vibrant patterns to pick from. This service adds a unique, fun solution for our customers and is ideal for paediatrics, long term splint wearers and companies who want to personalise their materials.

Exceptional Service

We endeavour to provide reliable and efficient service for all our customers by offering 48 hour delivery with all items held in stock. We aim to assist with any customer queries and deliver quality support without exception.

OUR ENVIRONMENTAL MISSION

Biodegradable Materials

We are consistently searching for ways to improve our impact on the environment and our newest eco-friendly X-Lite® range means there is zero waste for all splints and casts. Every orthosis made with X-Lite® material naturally biodegrades over time whether in compost or landfill. Due to the strength and durability of the material, the heating and cooling process can be repeated any number of times without material breakdown, meaning every bit of material can be repurposed.

Core S.E.T Principles

We aim to support our customers by following the core principles of **Service, Environment and Technology**. We are focused on reducing our footprint in the global environment, where we endeavour to minimise waste and encourage recycling through our business and supply chain. We use entirely recyclable packaging to deliver our orders, using paper tape and bags produced from sugar cane, the greenest material on the market. We also encourage our staff to be eco-conscious through the use of hybrid cars, reducing our impact when travelling.

Recycling Scheme

It's our mission to provide eco-conscious services and products, and as part of this we collect thermoplastic offcuts with our Manosplint® Offcuts Recycling Scheme. We were delighted to collect over 500kg of thermoplastic offcuts from our customers in 2022. These offcuts are converted to plastic pellets for use in our Kinetec Traction Weights, hence avoiding unnecessary waste going to landfill. Help us to help the planet by taking part in this recycling scheme (UK only).

DISCOVER

our brand new products

THERMOPLASTICS

X-Lite®

A unique, ecological solution in the Manosplint® range, made from 100% cotton mesh, engineered as a biodegradable material.

Ohio T

Highly requested new colour in metallic blue.

TECHNOLOGICAL INNOVATION

GripAble Pro

Make rehab fun with the GripAble Pro! Innovative and versatile evaluation and treatment device for hand and arm therapy, featuring interactive games.

ACCESSORIES

Manosplint® Hook & Loop

A new range of hook and loop providing more affordable options with Pro and Essentials products.

New Velcro Options

New colour options and material variations available - have a look on page 33.

3 Point Products

Have a look at our brand new range of finger and toe splints from 3 point products.

HEATING SOLUTIONS

Heat Pans with Bi-fold Lids

New Digital Heat Pans in our range featuring bi-fold lid and digital temperature control and timer function, for convenient and easy use.

Heat Pan Liners

Prevent your materials from the sticking to the bottom of the pan with our heat pan liners.

EXCELLENT QUALITY WITH BIODEGRADABLE TECHNOLOGY

We understand and support the importance of protecting our fragile environment which is one of the reasons why we have made our X-Lite® material biodegradable. As a true protector of nature you can compost it once all attachments like hooks, straps and padding are removed.

X-Lite® is the only casting material made from a cotton base impregnated with a non-toxic, safe polymer. The polymer is Polycaprolactone and it belongs to a group of polyester PCLs, which are a well-known implantable biomaterial.

Biodegradable

A recent test of biodegradability according to ISO 14855-1 standard, showed that X-Lite® is 25% biodegraded after 90 days.

Excellent Ventilation

The open structure in the material gives great ventilation and comfort. This allows the skin to breathe, besides providing an optimal environment for wound healing.

Strong Material, Less Plastic

X-Lite® is an extremely strong material. Use significantly less layers of material for equal strength compared to other splinting and casting materials on the market.

Variable Rigidity

Add layers for additional rigidity without compromising the low profile. Add strips to areas where additional reinforcement or support is desired.

Reusable and Remouldable

Save money and time. X-Lite® can be reheated an unlimited amount of times, allowing you to reuse rolls and leftovers. Make small changes on an already made cast/splint instead of a new one costing extra money, extra time and discomfort for your patient.

X-Lite® & 3D-Lite™

X-Lite® is an airy and lightweight Low Temperature Thermoplastic material engineered to meet your splinting, bracing and casting demands. The material is made from a 100% cotton mesh that has been impregnated with a non-toxic thermoplastic resin. All reactive substances in the thermoplastic have been cured, which means it does not contain any residues in unreacted form.

Non-Toxic and Safe

X-Lite® is a non-toxic material and emits no harmful substances when heated, applied or in the drying process. The material can be applied without the use of gloves and special ventilation equipment in the casting room and upon removal of the cast no harmful dust is produced. It is safe for all users to work with X-Lite®, including pregnant women, asthmatic patients and people that suffer from allergic reactions.

3D-Lite™

Our 3D-Lite™ material is made with a 3-Dimensional Polyester fabric which contributes to increased strength. It is a non-toxic and lightweight material similar to X-Lite with the ability to reuse and remould. 3D-Lite™ is a superior product for splinting and bracing and it also comes pre-cut for an individual fitted corset. Choose between 3 different thicknesses to vary rigidity.

How to use X-Lite®:

- X-Lite® should be heated in a splint bath set at 68-70°C.
- 3D-Lite™ should be heated in an oven set at 80° C or an infrared oven 60° C for 1.5 min. You can also use a heat gun for smaller pieces.
- X-Lite® sheets should be immersed in water for approximately 1 minute and the rolls approximately 3 minutes. Make sure the water penetrates the rolls.
- Always ensure that the material is properly heated before you start working.
- Use tongs to remove X-Lite® from the water bath to avoid direct contact with the water.
- Allow excess water to drain from the material. The material itself will not become warm.
- Protect and cover any wounds or scarring with appropriate dressings. For fracture casting or splinting apply stockinette and proceed with undercover padding to protect the skin before applying the material.
- Spot heat areas on the splint for permanent bond of accessories, straps and hook.
- Re-shape any number of times for the same patient. Reheat unused leftovers and rolls.
- Make small changes by spot heating a completed cast or splint with a regular hairdryer. Always keep your own hand close to the area you heat to avoid burning the patient.
- Cool the splint or cast with cold packs or ice spray for faster setting.

Ultra lightweight and airy
excellent for the patient and environment

X-Lite® is provided in three different options, Classic, Premium and Plus. The choice of product depends on the clinical indication and preference.

Classic is the original X-Lite® material. The large mesh openings give great ventilation. As the strongest material in our range, you can use it for any cast or splint of your choice. With its open structure, it is the airiest of the three materials. It stretches and conforms well to contours for a perfect fit. Classic comes in sheets, dispenser box and rolls. The rolls have a plastic separator you remove during the working process.

X-Lite® CLASSIC ROLLS, SHEETS & DISPENSERS

Choose between rolls and sheets in the sizes below, or a 10 m dispenser box.

- Original material
- Large mesh openings
- Great ventilation
- Extra strong and weight-bearing
- Available in White, Royal Blue & Anthracite

Extra strong material with excellent ventilation

X-Lite® Premium has a finer mesh than the Classic material and is even more conformable and stretchable.

It is ideal for smaller joints and therefore for splints and casts for the upper extremity and children. If you want your splint or cast to be extra strong you might consider adding an extra layer. Premium comes in sheets, dispenser box and rolls. The rolls have a plastic separator you remove during the working process.

X-Lite® PREMIUM ROLLS, SHEETS & DISPENSERS

Our most conformable material for casting. Choose between rolls and sheets in the sizes below, or a 10 m dispenser box.

X-Lite® Premium provides excellent conformability

X-Lite® Plus is the latest addition to the X-Lite® range. It is available in five colours and has a soft polyester fabric surface on one side.

Plus is almost similar in strength to Classic and can be used to make any cast or splint of your choice. It is made with X-Lite® premium combined with a polyester layer and it is supplied in various widths. Plus is a popular material for occupational therapists for splinting. It is provided in both rolls, sheets and dispensers. Plus rolls have no separator and forms easily and quickly, directly on the patient.

X-Lite® PLUS ROLLS, SHEETS & DISPENSERS

Our newest material for casting and splinting. You can choose between rolls in all 5 colors in 7 different widths. Sheets and boxes comes in selected colors.

A finer mesh with a soft fabric surface

Our 3D-Lite™ material features a base with 3-Dimensional Polyester fabric which contributes to increased strength. 3D-Lite™ is available in sheets in three different thicknesses - 3mm, 5mm and 7mm.

It is used for therapeutic splinting and bracing and is also suitable for larger applications. It is our thickest material and supplied in larger sheets. Our fabrication kits, Cut-4-Custom corset Lumbar-Sacral Orthosis (LSO) and Thoracolumbosacral orthosis (TLSO) are made out of 3D-Lite™ and share the same benefits as the rest of our products.

3D-LITE™ SHEETS

3D-Lite™ comes in three different thicknesses, each one suitable for different applications:

- 3mm**
 - Small joint and small anatomy. Excellent for rheumatoid patients.
- 5mm**
 - When more stability is needed, humeral fracture bracing, tibia fracture bracing, elbow splints, paediatric TLSOs.
- 7mm**
 - An extremely rigid material. Very suitable for adult TLSO's and other applications where maximum rigidity is required.

Made with 3-Dimensional Polyester fabric for increased strength

3D-LITE™					
ITEM NO.	COLOUR	WIDTH	LENGTH	THICKNESS	PACKAGE

3D-LITE™ - CUT-4-CUSTOM LSO & TLSO

Cut-4-Custom is a corset in 3D-Lite™ material which consists of a pre-cut front and back section with pre-attached straps. It is easily molded directly on the patient for a custom fitted stable corset.

The corset comes as a LSO and TLSO to accommodate prescription and patient anatomy. Find the right size by measuring your patient and compare with the Sizing Chart. Choose a Front and a Back. C4C panels are made in 3D-Lite™ Low Temperature Thermoplastic material.

- Front and Back sections have straps pre-attached. Both sections are ready to be heated and custom molded to the patient.
- 2 heights to accommodate prescription and patient anatomy.
- Backs and Fronts sold separately and are interchangeable.

Indications

- Compression fractures. Post-operative use.
- Stabilisation of the spine.

Ready at first patient visit

- Becomes soft - ready to mold to patient contours in less than 10 minutes
- Solidified and finished LSO or TLSO in approximately 20 minutes
- May be re-heated, flattened, and reformed several times
- Position of the pre-attached straps is easily changed for a further custom fit

Optimum draping and moldability

- Stretch in only one direction
- Rigidity in all directions

Increased patient comfort and compliance

- Aerated for breathability
- Lightweight
- Non-toxic, no reports of skin irritation
- May be worn in the shower

Size

Start by measuring the waist circumference. Take vertical measurement required to meet prescription criteria. Then select size from the table below.

3D-LITE™ CUT-4-CUSTOM					
	DESCRIPTION	CIRCUMFERENCE IN CM		FRONT HEIGHT IN CM	BACK HEIGHT IN CM
		min	max		
LSO	LSO, XS/S	60	72	19.5	30
	LSO, S/M	70	90	19.5	31.5
	LSO, M/L	85	105	21.5	33.5
	LSO, L/XL	95	120	24.5	35
	LSO, XL/XXL	115	140	27	36.5
TLSO	TLSO, S/M	70	90	42	42
	TLSO, M/L	85	110	48	48
	TLSO, XL/XXL	105	135	54	54

3D-LITE™ - CUT-4-CUSTOM LSO & TLSO

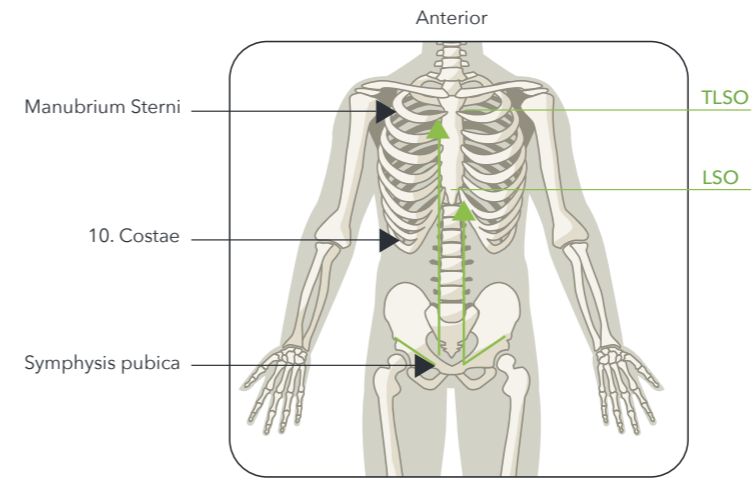

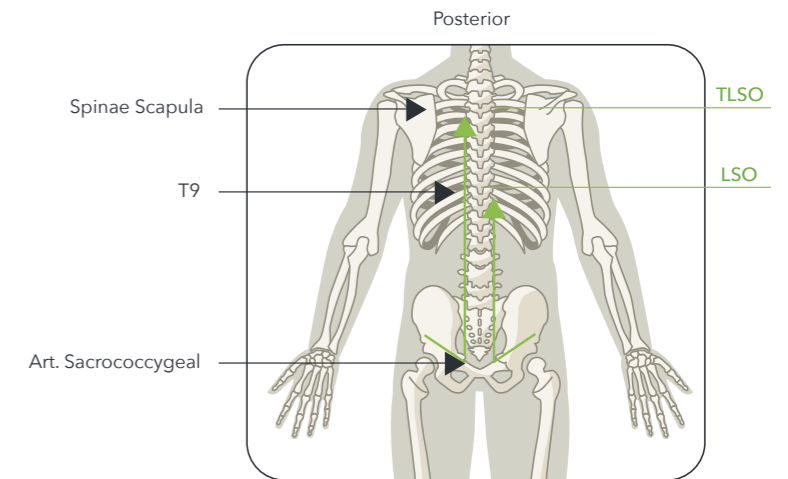

Illustration shows approx. height for the LSO/TLSO

Tips for best results

- Wrap the material using either elastic wrap or hospital abdominal binder.
- Start with the back section and when it has cooled, continue with the front.
- Wrapping is needed to assure the material fits the body contours and holds the precut in position until it hardens.

3D-LITE™ CUT-4-CUSTOM

To provide the patient with the best and most comfortable solution we have a wide range of accessories that will help you to complete your cast or splint. This includes X-Lite® edging tape to which gives a neat finish to your splint, as well as stockinette, hook and loop and casting scissors.

Our edging tape gives a soft and comfortable finish to your splint

X-Lite® Colour Elastic Bandage

The Elastic Support Bandage is breathable and has a soft surface with woven edges which feels comfortable against the skin. The custom elasticity secures the shape for both smaller and larger applications. It has an anti-slip surface. Washable at 60°C and can be sterilized by gas and steam at 134°C. Supplied in packages of 10 rolls in 5m length.

- 64106 0000 6cm, black
- 64107 0000 6cm, red
- 64108 0000 6cm, royal blue
- 64109 0000 6cm, green
- 64110 0000 6cm, yellow
- 64112 0000 10cm, black
- 64113 0000 10cm, royal blue

Mikrofix

Self-adhesive Hook and Loop. Ultra-thin, strong and high quality. The Hook material has very short hooks which does not tear unnecessarily and gives the patient greater comfort. Supplied in 50mm width and 25m length.

- 25040 0000 Mikrofix, hook (white)
- 25041 0000 Mikrofix, hook (black)
- 25042 0000 Mikrofix, loop (white)
- 25043 0000 Mikrofix, loop (black)

Silicone Rolling Pin

Rolling pin used to assist in adhering layers of X-Lite to make the material thicker. The silicone material ensures that the material doesn't stick to the rolling pin. Supplied in 38cm long.

- M40000019 Silicone Rolling Pin

X-Lite® Finishing/Edging Tape

X-Lite® Edging Tape is designed to cover the edges on a splint for a soft and comfortable finish. It is heated in a few seconds and bonds instantly on all X-Lite® and 3D-Lite™ material. Available in white.

- 64180 0000 25mm x 7.5m (1 dispenser)
- 64190 0000 50mm x 7.5m (1 dispenser)
- 64187 0000 25mm x 50cm (50 sheets)

X-Lite® PLUS Edging Tape

X-Lite® PLUS Edging tape gives a neat finish to the splint and secures a soft edge. It offers extra stability to the splint since it is made from our splinting material X-Lite® PLUS. It works very well with all our materials including 3D-Lite™. Heat in 70° C warm water. Supplied in a dispenser box.

- 64235 0000 25mm x 4m (White)
- 64236 0000 25mm x 4m (Red)
- 64237 0000 25mm x 4m (Blue)
- 64238 0000 25mm x 4m (Black)
- 64239 0000 25mm x 4m (Hot Pink)

X-Lite® Hook

An easy solution to attach your pile closure straps to your splint or brace. Bonded to the back of the "hook" is the same cotton gauze used in the Finishing/Edging Tape which bonds instantly and permanently on all our materials.

- 64195 0000 White, 5 x 50cm (5 sheets)
- 64196 0000 White, 5 x 500cm (1 dispenser)
- 64197 0000 Black, 5 x 50cm (5 sheets)
- 64198 0000 Black, 5 x 500cm (1 dispenser)

Soft Strapping

High quality double woven strapping material for any of your orthosis strapping needs. Slightly elasticated for increased flexibility. Supplied in 10m length.

- 25060 0000 40mm width, black
- 25061 0000 50mm width, black

X-Lite® Silicone Mat

The plate can be used as a support at the workstation. The silicone coating prevents the X-Lite® material from adhering against the surface. It can also be placed on top of a towel to soak up excess water.

- M400000018 40 x 30cm

Super Cast Scissors

High quality cast scissors which easily cut through all materials. The lower blade has fine serrations and a sharp-angled upper blade. Stainless steel and autoclavable.

- 51207 0000 18cm
- 51208 0000 14cm

Curved Nibbler Scissors

High quality, small precision scissors that cut both cold and warm splinting materials. Ideal for small adjustments around corners and trimming edges on a finished cast or splint. The lower cutting blade is serrated. Stainless steel and autoclavable.

- 51209 0000 12cm

3D-Safe

3D-Safe is a self-adhesive soft foam that adheres easily to 3D-Lite™ and leaves a soft edge around your splint.

- 64200 0000 White, 1 roll (40mm x 10m x 3mm)

Stockinette Dispenser

- Round knitted polyester stockinette
- Soft and comfortable against the skin.
- The Stockinette is ribbed which gives a good fit with no wrinkles against the skin.
- Supplied as a roll in a practical white dispenser box, 25m length.
 - 64394 0000 (30mm)
 - 64395 0000 (50mm)
 - 64396 0000 (70mm)
 - 64397 0000 (100mm)

X-Lite® Stockinette

- Round knitted stockinette in 100% non-bleached polypropylene.
- Soft and comfortable with an excellent ability to transport moisture away from the skin.
- Each roll is supplied in white and 10m length.
 - 64401 0001 (30mm)
 - 64411 0002 (50mm)
 - 64421 0003 (70mm)
 - 64431 0004 (100mm)
 - 64441 0006 (150mm)

X-Lite® Foam

- Padding is self-adhesive.
- Supplied in white and 2.75m length.
 - 64480 0003 (70mm, 20 rolls)
 - 64485 0000 (100mm, 16 rolls)
 - 64490 0005 (125mm, 10 rolls)

X-Lite® Splint Templates

Choose from a range of splint templates, each offered in small, medium and large sizes. These are available to download on the X-Lite page on our website for you to print and use. Contact us for more information or to receive physical templates to use.

Choose between:

-  Radial Bar Wrist Cock-Up
-  Thumb D-Model
-  Thumb Long
-  Resting Splint
-  Thumb Spica
-  Thumb Hole Wrist Cock-Up

Watch on YouTube

Watch video tutorials for each of the splint patterns on our YouTube channel @kinetecofficial. Learn tips and tricks for edging, layering and handling X-Lite to better understand how to use it for splinting.

X-Lite® Photo Tutorials

For easy to follow image tutorials for X-Lite splint fabrication, have a look at our website or contact us. Simply head to the X-Lite page on our website to view PDFs of all the tutorials.

Follow along the tutorials to understand how best to fabricate each of the X-Lite template splints.

Learn how to:

-  Layer X-Lite for different thicknesses
-  Use the X-Lite splint templates to create a range of splints
-  Using offcuts of X-Lite for edging the material
-  How to create smooth edges
-  How to size your splints using our templates

PRECUT PATTERNS SAVE TIME & ENERGY

Want more options?

Kinetec has the solution - with low minimums and fast service! Pick a Manosplint® Precut Pattern and choose the Manosplint® material, thickness, perforation and color.

Want more color and style?

Add Manosplint® Printing!

Have your own pattern?

We can cut it for you! Saving you time and waste in your clinic.

Manosplint® offers:

- Smooth edges
- Low minimums
- Fast service

manosplint® OUR COMPLETE RANGE OF THERMOPLASTICS

Our Manosplint® thermoplastic range comprises a full range of materials for all of your splinting needs. From 3.2mm to 1.6mm, high-to-low resistance to stretch, superb quality and great value. Allied to our services (offcuts recycling in the UK) and our unique bespoke printing technology, we should be the supplier of choice in your hand therapy clinic.

Exceptional edge finishing

Manosplint® Thermoplastic Material edges self-seal when cutting partially heated, leaving you with soft sealed edges.

Unique printing service

Our innovative Manosplint® printing technology allows us to print vibrant designs on all Demi sheets of Manosplint®.

Outstanding delivery

We provide 48 hour service to provide efficient delivery times for our customers.

Excellent stock

We provide high stock levels to ensure continuity of supply.

Competitive pricing

We offer high quality products at an affordable price.

Each of our materials have unique features to provide you with different advantages depending on the preferred application. The chart below offers specific features for each material to assist you in your selection.

Manosplint®	FEATURES					Benefits	Full details on page(s)
	Memory	RTS	Drape	Rigidity	Bonding		
CAROLINA	Moderate modifications	Maximum	Minimum	Maximum	Uncoated	Strong support with minimal drape.	page 18
MONTANA	Moderate modifications	Maximum	Moderate	Maximum	Uncoated	Medium drape and edges beautifully.	page 19
WISCONSIN	Moderate modifications		Moderate		Coated	Great for all users, with easy handling.	page 20
ARIZONA	Minor modifications	Minimum	Maximum	Moderate	Coated	Excellent drapability and detailed contouring.	page 21
OHIO	100%	Moderate	Moderate	Maximum	Coated	Translucent when heated allows visibility of target areas during fabrication.	page 22/23
OHIO T					Semi-coated		
OHIO S					Uncoated		

INNOVATIVE & EXCLUSIVE

We offer you a unique opportunity for images printed directly onto our Manosplint® thermoplastic material!

Create your own designs such as:

- Display your logo
- Create motivational word art
- Show your favorite pet
- Animal prints
- Flowers
- Patterns
- Landscapes
- Sports

The choice is endless, the results are fantastic and we can print to order!

SAMPLE PATTERNS

Examples of images and patterns shown. Colours and resolutions may vary due to image and material properties.

KEY INFORMATION

- Manosplint printing can only be printed on our 'demi' size sheets. Demi size is half the size of standard: 2 demi = 1 standard
- Visit our website www.kinetecuk.com or contact our office at enquiries@kinetecuk.com for a complete selection guide of Kinetec exclusive patterns and designs.

Watch for seasonal additions such as autumn leaves and snowflakes!

Sheet size for printing

Demi
12" x 18"
(30.5cm x 46cm)

~~Standard~~
18" x 24"
(46cm x 61cm)

~~Large~~
24" x 36"
(61cm x 91cm)

Suggested Clinical Applications

- Immobilisation orthoses – burn injuries, tendon and/or nerve injuries, fractures, arthritis, and neurological diagnoses
- Large orthoses – wrist/hand, elbow, lower extremity, and back

Memory

Moderate memory allows for light modifications and edge finishing.

Resistance to Stretch (RTS)

Maximum – requires firmer handling.

Drape

Minimum drape works best for larger applications.

Rigidity

Maximum. Holds shape against the pull of the patient or dynamic components.

Bonding & Finish

Non-coated material is slightly sticky and bonds easily to itself. Resists fingerprints.

Perforation

Available in solid and 1% perforation options.

Material Thickness

Available in 1/8" (3.2mm) thickness

Colours

Available in white only.
Can be printed to order. (Demi size only.)

Provides strong support and stays in place during application!

PERFORATION PATTERNS

CAROLINA					
THICKNESS	PERFORATION	COLOUR	SHEET SIZE		
			DEMI 12" x 18" (30.5 x 46cm)	STANDARD 18" x 24" (46 x 61cm)	LARGE 24" x 36" (61 x 92cm)
1/8" (3.2mm)	Solid	White	M1CN4D00WH	M1CN4S00WH	M1CN4L00WH
1/8" (3.2mm)	1%	White	M1CN4D01WH	M1CN4S01WH	M1CN4L01WH

Suggested Clinical Applications

- Immobilisation orthoses – wrist, thumb and hand; wide variety of diagnoses including paediatrics, tendon injuries, fractures, arthritis, and neurological diagnoses
- Mobilisation orthoses – serial static approach or base for dynamic and static progressive designs

Memory

Moderate. Will sping back slightly when heated.

Resistance to Stretch (RTS)

Moderate to maximum resistance to stretch. Can be stretched and pulled around curves without thinning or losing control.

Drape

Moderate. Takes on the contours of the hand and wrist for an intimate fit by using only moderate pressure.

Rigidity

Maximum. Splints will hold their shape against the pull of strong dynamic components and hypertonicity.

Bonding & Finish

Uncoated. Slightly sticky surface when warm. A permanent bond can be easily formed by applying dry heat and pinching it together.

Surface Finish & Edging

Resists fingerprinting and edges beautifully. Leaves sealed, smooth edges when cut warm.

Perforation

Solid (unperforated) and 1%.

Material Thickness

1/8" (3.2mm), 3/32" (2.4mm)

Colours

Available in white only.
Can be printed to order. (Demi size only)

Edges beautifully with moderate drape and has an uncoated surface.

PERFORATION PATTERNS

MONTANA					
THICKNESS	PERFORATION	COLOUR	SHEET SIZE		
			DEMI 12" x 18" (30.5 x 46cm)	STANDARD 18" x 24" (46 x 61cm)	LARGE 24" x 36" (61 x 92cm)
1/8" (3.2mm)	Solid	White	M1MN4D00WH	M1MN4S00WH	M1MN4L00WH
	1%		M1MN4D01WH	M1MN4S01WH	M1MN4L01WH
3/32" (2.4mm)	Solid		M1MN3D00WH	M1MN3S00WH	-
	1%		M1MN3D01WH	M1MN3S01WH	-

Suggested Clinical Applications

- Immobilisation orthoses – hand, wrist and thumb; wide variety of diagnoses
- Mobilisation orthoses – base for dynamic and static progressive designs

Memory

Minimum to moderate allows for easy modifications and edge finishing.

Resistance to Stretch (RTS)

Moderate handling with smooth strokes during molding. Shapes easily.

Drape

Moderate pressure needed for a conforming fit.

Rigidity

Moderate. Strong and flexible enough for easy donning and doffing.

Bonding & Finish

Coated material that will not adhere to itself unless the coating is removed.

Perforation

Available in solid and 1% perforation options.

Material Thickness

Available in 1/8" (3.2mm) and 3/32" (2.4mm) thicknesses.

Colours

Available in white, beige and blue. Can be printed to order. (Demi size only.)

Great overall performance! Conforming and sculpted finish provides great support and function.

	1%	White	M1WN3D01WH	M1WN3S01WH	

Suggested Clinical Applications

- Immobilisation orthoses – hand, wrist and thumb; wide variety of diagnoses
- Mobilisation orthoses – base for dynamic and static progressive designs

Memory

Minimum allows for spot heating for modifications and edge finishing.

Resistance to Stretch (RTS)

Minimum handling with light smooth strokes during fabrication. Detailed contouring.

Drape

Minimal pressure needed; material has excellent drape.

Rigidity

Moderate. Strong and flexible enough for easy donning and doffing.

Bonding & Finish

Coated material will not adhere to itself unless the coating is removed.

Perforation

Available in solid and 1% perforation options.

Material Thickness

Available in 1/8" (3.2mm) and 3/32" (2.4mm) thicknesses.

Colours

Available in white only. Can be printed to order. (Demi size only.)

Excellent drape. Superior conformability. Creates an intimate fitting orthosis.

ARIZONA					
THICKNESS	PERFORATION	COLOUR	SHEET SIZE		
			DEMI 12" x 18" (30.5 x 46cm)	STANDARD 18" x 24" (46 x 61cm)	LARGE 24" x 36" (61 x 92cm)

	1%		M1AN3D01WH	M1AN3S01WH	-

PERFORATION PATTERNS

Suggested Clinical Applications

- Immobilisation orthoses – wrist, thumb and hand; wide variety of diagnoses including pediatrics, tendon injuries, fractures, arthritis, and neurological diagnoses
- Mobilisation orthoses – serialstatic approach or base for dynamic and static progressive designs
- Circumferential designs

Memory

100% memory – when fully reheated can regain original size and shape.

Resistance to Stretch (RTS)

Moderate handling with smooth strokes during moulding. Shapes easily.

Drape

Moderate pressure needed for a conforming fit.

Rigidity

Maximum – strong support.

Bonding & Finish

Ohio – Coated material that resists fingerprints with a shiny finish. Will not adhere to itself unless the coating is removed.

Ohio T – Semi-coated material allows for it to ‘pinch and pop’. Acts as a second pair of hands to keep product in place during application. Resists fingerprints with a shiny finish.

Ohio S – Non-coated material allows for it to self-bond when warm and dry. Resists fingerprints with a shiny finish.

Perforation

Available in solid, 1%, 11%, 12%, 15%, 19%, 36% and 42% perforation options, depending on the material and thickness.

Material Thickness

1/8" (3.2mm), 3/32" (2.4mm), 1/12" (2.0mm) and 1/16" (1.6mm)

Colours

Available in white, beige, metallic blue and black. Can be printed to order. (Demi size only.)

PERFORATION PATTERNS

Create contoured, detailed orthoses.

Translucency when heated allows for visibility of target areas.

LIFT-OFF LID & HINGED LID HEAT PANS

COMPLETE RANGE

- Stainless steel
- Thermostatically controlled with an illuminated switch which indicates when the water has reached temperature
- Built in carry handles
- Insulated plastic lid handle
- Available with digital or analogue display
- Supplied with internal perforated tray
- Two year warranty
- Lift off Lid, Hinged Lid and Bi-Fold Lid options
- 5 size options: 5L, 9L, 18L (hinged lid only), 28L, 56L

Water Bath: 5 Litre

Lift-off Lid only. Weight: 5kg
 Internal dimensions:
 325 x 300 x 65mm (50mm with tray)
 External dimensions:
 361 x 332 x 135mm
Hinged Lid M200000041
Lift-off Lid M200000030

Water Bath: 9 Litre

Lift-off Lid and Hinged versions.
 Weight: 8kg
 Internal dimensions:
 500 x 300 x 65mm (50mm with tray)
 External dimensions:
 535 x 332 x 135mm
Hinged Lid M200000032
Lift-off Lid M200000031

Water Bath: 28 Litre

Lift-off Lid and Hinged versions.
 Supplied with integral drainage tap.
 Weight: 12.5kg
 Internal dimensions:
 500 x 300 x 200mm (185mm with tray)
 External dimensions:
 535 x 332 x 290mm
Hinged Lid M200000033
Lift-off Lid M200000034

Water Bath: 56 Litre

Lift-off Lid and Hinged versions.
 Supplied with integral drainage tap.
 Weight: 12.5kg.
 Internal dimensions:
 625 x 500 x 200mm (185mm with tray)
 External dimensions:
 660 x 532 x 290mm
Hinged Lid M200000036
Lift-off Lid M200000038

DIGITAL HEAT PANS

Manosplint® Digital Heat Pans are made from high quality stainless steel with lift off lid and hinged lid options.

It features digital temperature control and timer function for convenient and precise use. Provides the option to program an automatic start and stop to have the bath pre-heated when you arrive in your clinic. Supplied with a safety device which automatically stops the heating when the water level is too low.

- Each heat pan is supplied with an internal perforated tray.
- Lids have insulated handles so they can be handled safely.
- The hinged lids have been carefully designed to ensure that all condensation drains into the main tub when raised and lowered.

Supplied with a 2-year warranty

9 Litre Digital Heat Pan (800W)

Weight: 8kg
 Internal dimensions:
 L500 x L300 x L65mm (50mm with tray)
 External dimensions:
 W535 x D332 x H135mm
With hinges M200000039

28 Litre Digital Heat Pan (1500W)

Weight: 12.5kg
 Internal dimensions:
 W500 x D300 x H200mm (185mm with tray)
 External dimensions:
 W535 x D332 x H290mm
With hinges M200000040

BI-FOLD LID HEAT PANS

Our new range of heat pans feature an upgraded bi-fold lid that easily fits underneath worktops.

- Space-saving bi-fold mechanism
- Lid folds back discreetly
- Drips contained within the bath
- Close fitting lids help to retain water heat
- Easily fits underneath worktops
- New 18L size available! 325 x 300 x 200mm
- Same dimensions as Lift-off Lid and Hinged Lid variations
- Available in digital or analogue display

Analogue:

HEAT GUN

Outstanding, powerful 2000W heat gun. Designed to be used both upright and hand-held.

Features include

- Wide, flat base provides superb stability when placed upright
- Easy-access, big button control even when in upright position
- Two heat and airflow settings for preferred heating methods
- Lightweight, ergonomically designed for optimal weight distribution
- Range of nozzles provided
- Two year warranty

Product code M20351581

PORTABLE ELECTRIC SPLINT PAN (30CM SQUARE)

The pan simply plugs into the mains to deliver 1500W of power at temperatures of up to 240°C. It's a versatile, controllable pan with an inbuilt thermostat that enables you to control output.

Features include

- Cool-touch handles and lid knob. Powerful 1500W
- Durable and strong aluminium body with glass lid and steam vent
- Non-stick and large surface area: 30cm x 30cm x 5cm
- Inner dimensions: 30cm x 30cm x 5cm
- External dimensions: 32cm x 45cm x 13cm

Product code M202007089

ACCESSORIES FOR ALL CLINIC NEEDS

SAFETY CUTTER

The safest cutter on the market for cold thermoplastics. Provides significant improvement to your clinic's health and safety standards.

Reduce strain on therapists hands. Our cutting head design removes finger and hand strain experienced when using traditional tools such as a utility knife. Minimal effort is required - easily cuts up to 1/8" (3.2mm) thickness. The 26" (66cm) cutting length enables it to be used for your largest sheets. Also easy to handle and portable so it can be transported within your facility. Silicone feet on base provide stability and security for use.

Features include

- Full length silicone strips in the base and on the underside of the cutter bar hold all of your plastics in place during cutting
- Secure clamp bar easily raises to allow fine positioning of material
- Cutting channel for the blade removes the need for a cutting mat
- Easy to replace blades
- Supplied with pack of 100 blades
- Made in the UK with the highest quality materials
- Guaranteed for 5 years

Manosplint® Safety Cutter **M40SAB66M**

A quality range to compliment and help you complete the fabrication process.

*Clinic cutting innovation – quick, safe and easy!
 This innovative thermoplastic cutter should be a standard piece of clinic equipment.*

Manosplint® Levame blades

Extension traction system for fingers. Padding of slats in pre-cut 5 mm thick polyurethane foam. Perforation at the ends for quick setting of rivets. 2 thicknesses available depending on the desired hardness. Dimensions: 200mm x 10mm. Supplied in boxes of 50 units.

M800000003 0.3mm thick adult

M800000004 0.4mm thick strong adult

TOOLS & CUTTING SOLUTIONS

Curved Bandage Scissors

- Designed for patient safety
- Upward curve to take blades away from the patient
- Rounded tips to prevent digging in to a patients skin
- Plastic grips with rubber inserts
- Total length 13cm; blade length 5.0cm

Product code M40772313

Simple Bandage Scissors

- Blunted lower blade to protect the patient
- Angled to allow easier cutting under bandages
- Plastic grips with stainless steel blades
- Total length 19cm; blade length 4.5cm

Product code M400000007

Utility Knife

- Ergonomic grip for easier cutting and firm control
- Retractable blade
- Easy to change blades

Product code M400000004
Replacement Blades M400000005 10/pkg

Scissor Holster

- Keeps your scissors to hand at all times
- Suitable for all 8", 9" and 10" scissors
- Use with a belt
- Black leather with protective secure rivets at the blade end

Product code M400HOL001

Safety Straight Edge

- Designed to offer cutting accuracy and protection to the operator when marking, scoring and cutting
- Full length integral finger guard
- Fingers protected from slips of the knife when cutting
- Stainless steel raised cutting edge to protect blades
- Underside silicon grip strips to prevent slippage on materials
- UK Manufactured, Guaranteed for 5 years

90cm Straight Edge M40MS90
60cm Straight Edge M40MS60

Curved Mayo Scissors

- Manosplint® Essentials
- More affordable option
- Curved blades enable close cutting to the skin

Product code 14cm M400000016
Product code 19cm M400000017

Steel Scissors (Small)

- Pointed, blades for perfect cutting of most materials
- Ideal for cutting strapping materials as can be placed in the water bath for cleaning
- Simple steel handles
- Total length 15cm; blade length 6.5cm

Product code M40112015

Crayons

For drawing patterns on an orthosis or thermoplastic material. The marks remain even after immersion in water. Yellow color. Supplied in a pack of 12.

M400000011

Goniometer

The goniometer is 360° rotatable. Transparent PVC to quickly see the range of motion of the joints.

CUTTING SOLUTIONS : SHEARS & SCISSORS

Heavy Duty Shears

- Ideal for cutting cold plastics up to 3.2mm thick
- Self-opening
- Short, sturdy blades hot forged for endurance
- Length 24cm; blade length 4.5cm

Product code M40113824

Small Shears, Self-Opening

- Easy to use on cold plastics up to 2.4mm thick
- Small handles for easier use
- Simple closure clip, engaged one-handed
- Length 21cm; blade length 4.0cm

Product code M40766021

Short-Bladed Shears

- Pointed, short sturdy blades
- Ideal for detailed and delicate cutting
- Large comfortable handles with rubber inlays
- Length 18cm; blade length 3.5cm

Product code M40773718

Steel Shears

- Robust and easy to clean
- Supplied either straight or curved
- Length 21cm; blade length 7.5cm

Product code Straight Blade M400000013
Product code Curved Blade M400000012

Classic Universal Scissors

- Cuts a range of materials easily
- Large, ergonomic handles for easy gripping and control
- Strengthened plastic handles for robust use
- Total length 20cm; blade length 8.5cm

Product code M40762220

Stainless Steel Shears

- High quality shears suitable for cutting tough materials
- Short sturdy blades, with long handles for leverage
- Robust and easy to clean
- Ergonomic steel handles
- German made, life time guarantee
- Length 20cm; blade length 7.5cm

Product code M40113520

Long Blade Steel Shears

- Long steel blades
- Pointed tip for precise cutting
- Robust and strong
- Easily adjustable screw
- Top quality finish
- Length 20cm; blade length 10.5cm

Product code M40114520

Professional Universal Scissors

- Multi-purpose scissors, great for a range of materials
- Ice-tempered stainless steel blades
- Long pointed blades for easy and precise cutting
- Patented, ergonomic handles
- Length 20cm; blade length 8.5cm

Product code M40772020

Stainless Steel Universal Scissors

- High quality, German made
- Ideal for cutting warm plastics
- Long steel blades for smooth long cuts
- Long loop handles for powerful comfortable cutting
- Length 20cm; blade length 9.5cm

Product code M40112520

Left-Handed Universal Scissors

- High quality, left-handed scissors
- Long steel blades for long sweeping cuts
- Pointed tip for precise cutting
- Robust and strong
- Large, ergonomic handles for easy gripping and control
- Length 20cm; blade length 9.0cm

Product code M40762020-L

MANOSPLINT® HOOK & LOOP

NEW 2023

Our value range of adhesive hook provides options for more affordable alternatives, whilst delivering the highest quality of patient care.

Available from the Pro Range and the Essentials Range. Supplied in self-adhesive and non-adhesive options.

TESTING & EVALUATION TECHNOLOGY

ACTIVFORCE 2®

The Activforce 2 is a patented strength and angle measurement platform that utilizes advanced technology to collect and track real-time, objective data, improving efficiency, increasing client retention and driving better outcomes.

This device can be used to accurately measure and record active and passive range of motion, peak force, average force, force over time, force/weight ratio and muscle symmetry.

Activforce 2 can help improve compliance by offering a more accurate and objective gauge of the effectiveness of care. This product can help increase patient engagement and retention of objective, quantifiable data.

DA05ACTIV5M

TESTING & EVALUATION TECHNOLOGY

SQUEGG®

The Squegg is a small, simple, smart device which focuses on grip training. The ergonomic design of the smart grip trainer and the outer silicone shell offer optimal comfort with every grasp. The silicone shell prevents moisture accumulation and is also comforting to the skin.

It's tiny size makes the Squegg® a portable training device, carry it anywhere, and start your grip exercises wherever you are. The Squegg® also has a very long battery life with one charge offering up to 80 hours of use.

Connect via Bluetooth and grip the Squegg® to evaluate your grip strength, measure your grip count and track your progress.

The Squegg® also comes with in-app games for a fun and enjoyable experience and grip strength exercises for people of different fitness levels.

Product code
M4SQUEGGCORAL

Small, simple, smart device for measuring and exercising - great for home use!

GRIPABLE PRO NEW 2023

The Gripable Pro is an intelligent 2-in-1 device dedicated to evaluation, measurement and training, intended for people with reduced motor skills in the hand, wrist or arm.

- Ideal for professional use
- Create a dedicated profile for each of your patients
- Dynamometer function; different grip measurements possible (isometry, endurance, right/left comparison, GRIT, etc)
- Targeted work on each movement (grip/release, extension/flexion, ulnar/radial deviation, pronation/supination of the wrist)
- Motivating, interactive activities that adapt to the progress of the patient, including varying levels of difficulty

Make rehabilitation effective and fun!

Test and save patient grip strength and range of motion at the start of the session, so the activities adapt perfectly to the patient and their abilities.

Each activity has been created with a specific purpose and allows the practitioner to define specific therapeutic objectives using a combination of different movements (grip, release and wrist movements).

Product code
M4GAPWOT (without tablet)
M4GAPWIT (with tablet)

K-GRIP

The K-Grip is a dynamometer for grip strength assessment. Efficiently assess your patients' grip strength in seconds. Dedicated to assess and train grip strength, K-Grip is a must have for neurological rehabilitation and tracking fatigue in high-performance athletes.

Train your patients on a specific number of repetitions to reach a specific target and control the achievement as well as the pace of the repetitions in real-time. Evaluate grip strength in seconds, as the sensors provide real-time feedback through Kinvent Physio app.

FINGER SPLINTS

OVAL-8® FINGER SPLINTS

The Original Oval-8 Finger Splints in Classic Beige are the ideal choice whenever you need to stabilise, realign or immobilise the small joints of your patient's fingers. The versatile 3-point pressure design allows each Oval-8 Finger Splint to treat 6 or more conditions with a simple turn of the splint.

Use Oval-8 Finger Splints to manage Mallet Finger, stabilise Swan Neck and Boutonniere Deformities, relieve Trigger Finger/Thumb, realign Lateral Deviation, protect Arthritis, Fractures and limit Hypermobility (Ehlers-Danlos syndrome).

Features

- The classic Oval-8 Beige Finger Splints offer support, a customizable fit and comfort for the IP joints of the fingers and thumbs.
- Comfortable, lightweight and waterproof.
- Strong and resistant to breaking and very long-lasting.

Oval-8s help to treat a range of conditions:

- Oval-8 splints help manage tendon or ligament injuries, protect healing fractures, control unstable joints, prevent contractures relieve triggering and more.
- The splint's symmetrical 3-point pressure design with the band applying the corrective force and the oval section as the counterforce to stabilise the joint.

P1007-50	2.54cm 3pp Buddy Loops Pkg of 50 Black	Universal - 1" wide

Features

- Loop-and-wrap design secures two or more toes together to stabilise fractures, straighten and cushion hammertoes and claw toes, and realign overlapping toes.
- Fully adjustable and ideal following surgery and to help maintain alignment.
- Soft, non-slip foam distributes pressure without adding bulk and the loops can easily be worn under socks and in most shoes.
- Available in two widths: wide fits the great toe and narrow fits the smaller toes; can be trimmed for a custom fit.
- Hand washable; No natural rubber latex was used in the manufacture of this medical product.
- Indications: Hammertoes, Overlapping Toes, Foot/Toe Injury.
- Available in 1/2", 3/4" and 1" widths. All 5" length.

NEW 2023

3pp® TOE LOOPS®

The easy-to-apply loop and wrap design of the 3pp® Toe Loops® makes them the ideal choice to manage hammertoes, claw toes, overlapping toes and non-displaced fractures. The soft foam lining cushions and gently grips the toes to relieve pain from calluses or corns and makes it easy to realign overlapping toes.

CONTINUOUS PASSIVE MOTION FUNCTION, MOBILITY & CONFIDENCE

KINETEC MAESTRA™

The hand and wrist CPM with the most extensive exercises available on the market.

- Up to 9 anatomical movements mobilising 14 joints
- A fantastic complement to wrist, fingers and thumb rehabilitation
- Intuitive remote control with individual keys for each movement
- Featuring an educational DVD guiding the user through patient set up and therapy

Anatomical and precise motion

The Kinetec Maestra™ is a complete solution for wrist, fingers and thumb passive rehabilitation. It is the most extensive CPM device on the market and fulfils most of the requirements in hand and wrist passive therapy.

Digital remote control

The digital remote control technology from Kinetec® has been featured in the device to provide a visual feedback to the patient as well as movement accuracy during therapy. The top panel is dedicated to each movement available with the unit.

Interactive guide

The device is also delivered with an educational DVD guiding the user through the patient set up and therapy. This useful tool also provides tips and advice from health professionals on the pathologies and protocols to be covered by the device.

Technical specifications

- Possibility to block the adjustment of the parameters
- Start/Stop and reverse are always available to the patient
- Precise adjustment of the parameters of the movement: ROM, speed, pauses at the limit of extension or flexion, for improved outcomes
- 2 year full warranty
- Size of the device: Length 14" (35cm), width 16" (41cm), height 12" (30cm)
- Patient size: all hand sizes from 7 years

ULNAR DEVIATION THUMB OPPOSITION WRIST EXTENSION/FLEXION

A complete solution for wrist, fingers and thumb passive rehabilitation.

KINETEC 6080 ELBOW™

The original Kinetec® design dedicated to the elbow joint.

- Synchronised and anatomical movements
- Extension/flexion combined with pronation/supination
- Easy to use in bed or in a sitting position
- Patient friendly remote control and adjustments

A design built for immediate post-operative treatment

Post-operative treatment using this device provides an effective deterrent to stiffness and loss of range of motion.

Synchronised movements for a more anatomically correct therapy

This unit can provide extension/flexion with synchronised pronation/supination.

Technical specifications

- Start/Stop and reverse always available for the patient
- Load reverse ensures patient protection when excessive force is exerted on the joint
- 2 year full warranty
- Patient sizing: from 4.6 ft to 6.2 ft (1.4m to 1.9m)
