## Why the Cryo Pro™ is ideal for rehabilitation:

### Easy to use:

- The Cryo Pro™ enables you to target specific areas of pain or swelling with our full range of wraps. These include 360 Knee, Shoulder, Ankle, Universal, Full Leg and Full Long Leg.

### Easily portable:

- The unit comes with a handle which is designed to balance when water and ice are in the reservoir.
- There is also the option to use the portable bag and power bank so you aren't constricted to mains power.

### Automated compression:

- Tailor your recovery with the Cryo Pro™! Choose between Low, Medium and High compression, simply press the play button and experience cold therapy relief.

## COLD THERAPY BENEFITS

### Reduce pain and swelling:

Encourage quick and effective healing for muscle, tendon and ligament injuries. Help to calm muscle spasms, minimise bruising and soothe nerve endings.

### How does it work?

Cold compression therapy works by constricting the blood vessels, which in turn reduces swelling and inflammation. Cold therapy can also help reduce the amount of bruising by slowing down blood flow to an injured area.

### Natural healing:

Cold compression can help reduce a patient's dependence on painkillers following injury.

'encourage quick and effective healing for a variety of injuries'
